# Official Partnership Proposal

Teammate Matchmaking, Collaboration Spaces & Retention  
Automation for Omnicon National Hackathon 2026

---

**PREPARED FOR**

Omnicon Organizing Committee

**PREPARED BY**

HackerMate Team

**PROPOSED DATE**

July 27, 2026

**STATUS**

**Urgent Review**

## Solving the Team Formation Bottleneck

Omnikon 2026 features a strict team size of **1 to 2 builders**. In a national-level hackathon with multiple evaluation stages, finding the single right partner is the most critical driver of participant success and project submission quality.

### ⚠️ THE CHALLENGE

- **Discord Chaos:** Pinned chats and spamming in `#find-teammates` make it impossible to filter builders by exact skills or track interest.
- **High Attrition Rate:** Online hackathons spanning weeks suffer from 50%+ team dropout rates due to poor initial pairing and lack of engagement.
- **Mismatched Tech Stacks:** Builders form teams on a whim, only to drop out when their technologies or working styles conflict.

### ✅ THE HACKERMATE SOLUTION

- **Compatibility Engine:** Automated matching based on verified skills, tracks, and college details.
- **Built-In Team Workspaces:** Dedicated workspace for messaging, resource mapping, and task management.
- **GitHub Integration:** Verification of profiles through developer stats, ensuring only active coders are matched.

**Why this matters for Omnikon:** Higher matchmaking accuracy translates directly to higher project submission rates, better prototype quality, and an overall premium experience for participants.

## HackerMate's Core Capabilities

**01**

### Teammate Discovery

Advanced search filters allowing users to discover developers in India with exact skills needed for Omnikon tracks.

**02**

### Collaboration Workspaces

Built-in chat workspaces to coordinate on Stage 1 (PDF) and Stage 2 (PPT) submission details.

## Automated Retention Alerts

Online developer events lose engagement quickly. HackerMate solves this by integrating automated **24-hour deadline notifications**.

### Cron-Driven Email Alerts

Enabled

HackerMate's background cron worker automatically triggers custom notification emails to participants who save Omnikon, sending alerts 24 hours prior to Phase 1 (Idea), Phase 2 (PPT), and Final code deadlines to ensure teams complete their submissions.

## Proposed Partnership Deliverables

| HackerMate Delivers <span>VALUE</span>                                                                                       | We Ask from Omnikon <span>MARKETING</span>                                                                                                              |
|------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Dedicated Matchmaking Portal:</b> A branded space on HackerMate for Omnikon participants to register and search partners. | <b>Official Matching Partner:</b> HackerMate listed as the official team formation partner on the Unstop landing page.                                  |
| <b>GitHub Verification:</b> Pre-vetted profiles showcasing developer stats, portfolios, and coding history.                  | <b>Discord &amp; Confirmation Integration:</b> Pinning our matchmaking link in Discord, and adding it to the registration confirmation emails/WhatsApp. |
| <b>Retention System:</b> Automated reminder workflow to minimize participant dropout rate.                                   | <b>Logo &amp; Co-marketing:</b> Brand placement in flyers, slide decks, and a joint social media post (LinkedIn/Instagram).                             |

## Execution Roadmap

### Phase A: Setup & Integration (July 27 - 31)

Set up Omnikon details on HackerMate, launch dedicated portal, and verify email templates.

### Phase B: Launch Matching (August 1 - 14)

Drive registered Unstop users to HackerMate to form teams before registrations close on Aug 14.

### Phase C: Submission Support (August 15 - Sept 1)

Activate automated cron email alerts for Idea, PPT, and Prototype deadlines.
